

## Exports ♦ May 2009

- Over the first five months of 2009, British Columbia origin exports were down 18.7% from the same period a year earlier. Shipments to BC's largest trading partner, the United States, slumped 25.8%. Exports to the European Union were 28.7% off of last year's pace and shipments to Japan fell 13.5%. One bright spot was exports to Mainland China, which climbed 8.9%.
- The forest sector is one of the main contributors to the decline in the value of exports. Both shipments of solid wood (-26.4%) and pulp and paper products (-26.2%) have fallen dramatically over the first five months of 2009, compared to January to May 2008. A slump in demand for building products in the United States is one of the main reasons for the decline in shipments of wood products. Pulp (-34.9%) was responsible for most of the drop in overall pulp and paper exports, although shipments of newsprint (-12.6%) and other paper and paperboard (-10.7%) also fell.
- Metal exports were also well down over the first five months of 2009, with shipments of metallic mineral exports plunging 38.2% and exports of fabricated metal products dropping 28.1%. Exports of copper ores and concentrates (-30.1%), molybdenum ores and concentrates (-56.6%), unwrought aluminum (-29.3%), unwrought zinc (-46.4%) and other metallic minerals (-37.3%) have all experienced substantial declines as the global economic slowdown has affected demand for these goods.
- Another significant export from BC, machinery and equipment, also experienced a large

decline in shipments (-15.2%), led by a 41.6% slump in shipments of motor vehicles and parts.

- Exports of energy products, which were the one bright spot earlier in the year, have now joined the pack with a 7.8% drop year-to-date to May. A 47.8% slump in coal shipments in May, compared to the same month last year, is the reason for the turnaround, although year-to-date exports of coal are still 21.4% higher than in the first five months of 2008. The drop in May reflects new contract prices for coal, which are well down from 2008, although they remain the second highest price levels ever. Elsewhere in the energy sector, exports of both electricity (-46.5%) and natural gas (-29.3%) have dropped significantly.

Mainland China is one of the few destinations to which BC exports have been trending up

## SEASONALLY ADJUSTED EXPORTS

Seasonal adjustment supplies a means of making month-to-month comparisons by removing the regular periodic seasonal fluctuations that occur. Variations from normal seasonal patterns are revealed in the seasonally adjusted data series.

- BC exports continue to slump as May marked the first time since 1996 that the monthly value of exports was below \$2 billion. Exports fell 5.7%, driven down mainly by a 12.4% plunge in energy product exports and a 5.1% drop in shipments of forest products. Machinery, equipment and automobiles bucked the trend with exports rising 2.1%.
- All the decline was in shipments overseas (-13.6%) as exports to the US actually climbed 1.8%, mainly on the strength of a 7.4% jump in energy product exports.

*Exports (adjusted for seasonality)  
continued to trend down in May*

## Trade with the Other Americas

Over the last several years, Canada has been engaged in developing stronger ties within the Americas, including not only North America, but also the Caribbean, Central America and South America. This commitment was articulated by Prime Minister Harper back in July 2007 when he stated, "Canada's government has made it clear that re-engagement in the Americas is a critical international priority for our country...Canada is committed to playing a bigger role in the Americas and to doing so for the long term."<sup>1</sup>

The larger role for Canada includes deeper trade ties with its hemispheric neighbours. To this end, Canada has been included in efforts to develop a Free Trade Area of the Americas, which would encompass most of the Western Hemisphere, with the notable exception of Cuba. Negotiations for this accord have stalled and given the difficulties inherent in coming to an agreement with such a large number of nations, many countries in the region have negotiated smaller agreements among themselves. Canada itself has been actively involved in negotiations with several countries in the Americas. It is currently working on deals with the CARICOM nations,<sup>2</sup> the Central American Four

countries,<sup>3</sup> the Dominican Republic and Panama and has reached agreements in principle on free trade with both Peru and Colombia. The deal with Peru has been adopted by Parliament and received Royal Assent, while the Colombia trade agreement is still before Parliament.

While the agreement with Peru has been met with little resistance (although there have been some violent demonstrations in Peru against a possible United States-Peru free trade agreement), the same cannot be said about the potential deal with Colombia. There have been a number of groups that have raised objections to such a deal on the basis of the flagrant abuses of human rights that have occurred in recent years in Colombia, particularly the persecution and murder of many union leaders.<sup>4</sup> They argue that Canada should not enter into a free trade agreement until Colombia has committed itself to protecting human rights.

The opposing viewpoint was fairly clearly expressed by Prime Minister Harper when he said, "While there is no denying that Colombians continue to live with serious security challenges, the improvements we have seen over the last several years gives us much reason for optimism...Deepening both economic and political engagement between our countries is the best way Canadians can support the citizens of

<sup>2</sup> The CARICOM (Caribbean Community) consists of 15 nations: Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, and Trinidad and Tobago.

---

<sup>3</sup> The Central American Four countries are El Salvador, Guatemala, Honduras and Nicaragua.

<sup>4</sup> These groups include the Canadian Labour Congress, CUPE and other trade unions, various church groups, among others.

Colombia in their efforts to create a safer and more prosperous democracy.”<sup>5</sup>

In other words, the idea is that the best way to foster democracy and freedom is to enhance ties, thereby giving Canada more leverage to push for improvements in human rights conditions. In addition, free trade would theoretically bring economic improvements to Colombia, which would reduce poverty and remove much of the incentive to engage in illegal activities, such as the drug trade.

Canada already has free trade deals with two countries in the “other Americas” (i.e., excluding North America): Chile and Costa Rica. If the other deals in the works come to fruition, Canada will have moved a long way toward having free trade with most of the Western Hemisphere.

BC's exports to the other Americas has been rising over the last decade

Source: Statistics Canada

Canada's current trade with the other Americas is still fairly small. Less than two percent of Canada's commodity exports were shipped to that region in 2008. For British Columbia, the share was slightly higher, at just under three percent. However, the 2008 figure was substantially higher than the value of merchandise exports from a year earlier. The value of Canadian exports to the other Americas jumped 36% between 2007 and 2008, while BC's exports climbed 79%. BC's exports to the region have been rising over the last decade, but the leap in 2008 dwarfed all other annual increases in the last ten years.

Brazil was the destination for almost half of BC's exports to the other Americas in 2008

Source: Statistics Canada

More than half of the year-over-year increase was in shipments to Brazil. Both British Columbia and Canada as a whole saw their exports to Brazil soar in 2008, with Canadian shipments to that country climbing 78% and BC's exports to Brazil more than doubling (+117%) to approximately \$436 million. That was almost half (48%)

<sup>5</sup> <http://pm.gc.ca/eng/media.asp?id=2321>

of the total value of BC's exports to the other Americas in 2008.

Most of the increase in shipments from BC to Brazil between 2007 and 2008 was in the form of either coal or sulphur. For Canada as a whole there were also significant increments in shipments of fertilizers, newsprint, iron and wheat. These goods also represented the top goods shipped to Brazil from BC and Canada. In fact, for BC, coal made up 79% of all goods shipped to Brazil in 2008, with sulphur comprising a further 15%. Canada's exports were somewhat more diversified, but four goods (fertilizer, coal, sulphur and newsprint) made up over half of all Canadian commodity exports to Brazil.

**Top Five Destinations for BC Exports  
in the Other Americas, 2008**

Country	\$Cdn Millions	% of BC Exports to Other Americas
Brazil	435.5	48
Chile	126.9	14
Cuba	102.4	11
Guatemala	50.7	6
Venezuela	36.4	4
Total	915.4	100

**Top Five Destinations for Canadian Exports  
in the Other Americas, 2008**

Country	\$Cdn Millions	% of Canadian Exports to Other Americas
Brazil	2,499.0	31
Venezuela	804.6	10
Chile	675.5	8
Colombia	642.4	8
Cuba	616.6	8
Total	8,049.4	100

After Brazil, Chile was the next most significant destination for BC exports to the other Americas in 2008. Chile is also a significant recipient

of service exports from BC and the rest of Canada, particularly services related to the mining industry.

Cuba ranked third as a destination for BC goods exports to the other Americas in 2008 and fifth as a destination for Canadian exports. Despite Cuba's relative importance as a trade partner in this region, it is usually shunned in terms of free trade discussions. This is generally due to the hostility between Cuba and the United States and the current embargo on trade between those two nations.

Canada's two-way commodity trade with the other Americas in 2008 amounted to just under \$22.4 billion, which is a fraction of Canada's two-way trade with the United States (\$602.5 billion). Nevertheless, the region offers promise as a more significant trade partner in the future.

**Canada has a deficit in trade in goods  
with the other Americas...**

Source: Statistics Canada

Canada currently has a trade deficit with the other Americas, both in goods and services. The deficit in goods was over \$5 billion in 2008,

which is a significant drop from a year earlier when it stood at \$7 billion. The deficit in trade in services stood at just over a billion dollars in 2006, the last year for which such data are available.

...and also a deficit in trade in services

Source: Statistics Canada

The strong growth in both exports and imports over the last few years reflects Canada's commitment to make the Americas more of a priority. Given the new free trade agreement with Peru and the likelihood that the Colombia deal will soon be ratified by Parliament, and given the other free trade discussions underway with other nations of the Americas, this region could be one of growth in terms of trade with both BC and the rest of Canada.

## NOTES

**Countries Included Within World Regions:**

**(1) Western Europe:** United Kingdom, Ireland, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland.

**(2) Eastern Europe:** other Europe, including all of Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, etc.

**(3) South East Asia:** Malaysia, Brunei Darussalam, Singapore, Myanmar, Kampuchea, Laos, Indonesia, Philippines, Thailand, Vietnam.

**(4) Africa:** continental Africa, excluding Ethiopia, Libya, Somalia, Sudan, Egypt.

**(5) South America:** continental South America from Colombia and Venezuela south to Chile and Argentina, including offshore islands, but not Caribbean.

**(6) Central America and Caribbean:** from Guatemala and Belize to Panama, plus Caribbean Islands.

**(7) Pacific Rim (including Japan):** Japan, Hong Kong, Malaysia, Brunei Darussalam, Singapore, Laos, Mongolia, China, Indonesia, North Korea, South Korea, Philippines, Macau, Taiwan, Thailand, Vietnam, Australia, Fiji, New Zealand.

**(8) Pacific Rim:** as above, but excluding Japan.

**(9) Middle East:** from Turkey and Iran south through the Arabian Peninsula. Excluding Afghanistan and Pakistan, but including Cyprus, Ethiopia, Egypt, Somalia, Sudan and Libya.

The **European Union** is the membership as of January 1, 2007: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania,

Slovakia, Slovenia, Spain, Sweden, United Kingdom.

**'Selected Value-added Wood Products'** category includes prefabricated houses, doors, windows, furniture, moulding, siding, etc. It does not include panel products, shakes, shingles or any pulp and paper products.

**Revisions**

Statistics Canada revises trade data for the previous three data years with release of the December data. The revision number is indicated in the footer of the tables (e.g., Rev 1 is the first annual revision, etc., and Prelim indicates it is the first release of data to December for that year). In addition to annual revisions, Statistics Canada revises the data for the previous data year every quarter (indicated in the footer by Rev Q1, etc) as well as with the release of the January and February data.

**Service Offered for Detailed Trade Statistics**

For BC government statistics users requiring more detailed information on exports or imports, a special report service is offered through the address below:

**Dan Schrier**

**BC Stats**

P.O. Box 9410 Stn Prov Govt

Victoria, B.C. V8W 9V1

(250) 387-0376

This service is provided through the Trade Research and Inquiry Package (TRIP) computer reporting system. TRIP offers user-defined tabulations of export or import statistics for BC, Canada, the United States and other countries. Tabulations can include information on commodities, countries, US states, years, months, mode of transport, etc.
